DETAILED ACTION

The following is responsive to Applicant's election received Jul. 18, 2003.

Applicant's election presents a sub-generic compound, which continues to encompass a plurality of distinct species, particularly concerning the moiety "Ar" in elected group 1 for substituent "Z". Therefore, an election of a specific compound is respectfully requested.

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Supplemental Election/Restrictions

Claim 1 is generic to a plurality of claimed and disclosed patentably distinct species comprising a method of treating "reduced vascular compliance, elevated pulse pressure and hypertension" in an animal by administering a compound of Formula (I), wherein "Q" is N, O, or S; "Z" is as defined in groups 1-6; and "Y" is amino or a group of the formula CH(R5)-R6. Applicant is respectfully requested to elect a single species for "Q" (i.e. either N or O or S), a single species for "Z" (i.e. the groups in either 1 or 2 or 3 or 4 or 5 or 6), and a single species for "Y" (i.e. either "amino" or CH(R5)-R6). Applicant is also requested to elect a single compound. To assist the Examiner in the search of the claimed subject matter, Applicant is respectfully requested to submit a structural drawing of the elected compound. Moreover, Applicant is respectfully requested to elect a single condition, i.e. hypertension. The diseases set forth are patentably distinct and the search for one is not required for the other. The species of compounds set forth in the claims are chemically and structurally distinct and the search for one would not be

required for the other. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cybille Delacroix-Muirheid whose telephone number is 703-306-3227. The examiner can normally be reached on Mon-Fri from 9:30 to 6:00.

Art Unit: 1614

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
